

6.3 The Scene Type Emotional Template Library

6.3.1 Scene Type Selection Checklist

Ask yourself what the scene is doing in the story. Check the one that matches.

- ☐ Two characters meeting for the first time, attraction sparking through awkwardness → **Meet-Cute**
- ☐ The first physical moment of connection, anticipation at its peak → **First Kiss**
- ☐ Characters talking past each other, each saying one thing and meaning another → **Misunderstanding**
- ☐ One character dropping all defenses to declare something aloud for the first time → **Grand Gesture**
- ☐ The core wound cracking open, the cruelest or most final words spoken → **Dark Moment**
- ☐ Two characters cautiously approaching each other after a rupture → **Reconciliation**
- ☐ Affection expressed through teasing, callbacks, and playful one-upmanship → **Banter-Heavy Montage**
- ☐ One character handing another person something emotionally fragile → **Intimate Vulnerability**

6.3.2 The Eight Scene Type Templates

The Meet-Cute

Parameter	Configuration
Intensity	Light, curious, charged with first-impression energy.
Subtext Density	Low. Attraction is expressed through observation and reaction rather than heavy unspoken weight.
Pacing	Quick exchanges, interruptions, overlapping speech. The rhythm of two people talking past and around each other before connecting.

The First Kiss

Parameter	Configuration
Intensity	Moderate to high. Anticipation builds through the scene.
Subtext Density	Medium to heavy. The characters circle the moment, saying everything except the thing.

Parameter	Configuration
Pacing	Slow acceleration. Exchanges lengthen as the scene approaches the kiss, then a sharp compression at the moment of contact.

The Misunderstanding

Parameter	Configuration
Intensity	Moderate to high. Frustration and hurt compress the dialogue.
Subtext Density	Heavy. Each character says one thing and means another. The reader sees both layers.
Pacing	Uneven. One character pushes. The other deflects. The rhythm breaks with interruptions and subject changes.

The Grand Gesture

Parameter	Configuration
Intensity	High. Vulnerability breaks through the character's default register.
Subtext Density	Low to medium. The emotional truth is spoken aloud for the first time.
Pacing	Building to a single sustained monologue or declaration, then a pause, then the response.

The Dark Moment

Parameter	Configuration
Intensity	Peak. The character's core wound is fully activated.
Subtext Density	Heavy. The character says the cruelest or most final thing they can manage. The subtext carries the grief underneath.
Pacing	Compressed. Short exchanges, silences, one devastating line, then withdrawal.

The Reconciliation

Parameter	Configuration
Intensity	Moderate. Exhaustion and tentative hope modulate the register.

Parameter	Configuration
Subtext Density	Medium. The characters test whether the other person is still safe to approach.
Pacing	Slow, halting. False starts and restarted sentences. The rhythm of two people rebuilding trust in real time.

The Banter-Heavy Montage

Parameter	Configuration
Intensity	Light to moderate. Affection is expressed through teasing and one-upmanship.
Subtext Density	Light. The subtext is "I enjoy you" rather than heavy emotional weight.
Pacing	Rapid-fire. Overlapping dialogue, callbacks, interruptions. The rhythm of two people who are genuinely having fun.

The Intimate Vulnerability

Parameter	Configuration
Intensity	High. The character's defenses are fully down.
Subtext Density	Medium. The character says the true thing but still manages it, still shapes how it lands.
Pacing	Slow. Long pauses, trailing sentences, one word at a time. The rhythm of someone handing another person something fragile.

6.3.3 Scene Type Configuration Record

Scene Type: [SELECTED_TEMPLATE_NAME]
Scene Context: [BRIEF_DESCRIPTION_OF_WHAT_IS_HAPPENING]
