

6.4 The Three-Layer Stacking System

Your complete emotional instruction set requires three layers operating simultaneously. Each layer governs a different dimension. All three must be present in every generation prompt.

Layer	What It Governs	Source
Layer 1: Character Filter	Internal emotional logic (what the character feels, manages, and hides)	Chapter 5 Three-Tier Emotional Filter
Layer 2: Genre Calibration	Volume and density for your market (how loud, how thick, how fast)	Genre Calibration Reference Chart
Layer 3: Scene Template	Specific emotional signature of this moment in the story	Scene Type Emotional Template Library

6.4.1 Three-Layer Stacking Verification Checklist

Run this before every generation pass.

- ☐ Layer 1: My character's Three-Tier Emotional Filter is included in the prompt.
- ☐ Layer 2: My genre calibration parameters (Intensity, Subtext Density, Pacing Curve) are included in the prompt.
- ☐ Layer 3: My scene-type template configuration is included in the prompt.
- ☐ I have confirmed the scene-type template is applied on top of the genre calibration, not replacing it.
- ☐ I can name the emotional signature this scene should produce in one sentence.

6.4.2 Three-Layer Stacking Record

Layer	High-Tension Scene	Tender Scene	Light Scene
Scene Type Selected	[E.G., Dark Moment]	[E.G., First Kiss]	[E.G., Banter-Heavy Montage]
Layer 1: Character Filter	[Included / Missing]	[Included / Missing]	[Included / Missing]
Layer 2: Genre Calibration	[Included / Missing]	[Included / Missing]	[Included / Missing]
Layer 3: Scene Template	[Included / Missing]	[Included / Missing]	[Included / Missing]

Layer	High-Tension Scene	Tender Scene	Light Scene
Stacking Order Confirmed	[Yes / No]	[Yes / No]	[Yes / No]

If any cell reads "Missing," add that layer before proceeding to generation.
