

7.4 Version Control System

7.4.1 Decision Tree: Should I Increment the Version?

Use this tree every time you edit a voice asset.

Step 1 – Did I change the document?

- **No** → No version change. Save and move on.
- **Yes** → Proceed to Step 2.

Step 2 – Does the change alter how the AI generates dialogue?

- **No** (typo fix, reformatting, clarification of wording without changing the constraint) → Cosmetic change. No version increment. Save and move on.
- **Yes** → Proceed to Step 3.

Step 3 – What level is the change?

Change Type	Definition	Action
Major	Added or removed an entire field, or fundamentally restructured the character's voice architecture	Increment the major number. Reset the minor number to zero.
Minor	Tightened a constraint, added a signature tic, refined a trigger response, or adjusted a parameter within the existing structure	Increment the minor number by one.

Version format: v[major].[minor]

Example progression: v1.0 (initial build) → v1.1 (added Emotional Filter) → v1.2 (applied genre calibration) → v2.0 (cadence restructured for new arc stage)

7.4.2 Version Change Log

Character: [CHARACTER_NAME]

Asset Type: [DIALOGUE_MATRIX / EMOTIONAL_FILTER / GENRE_CALIBRATION]

Version	Date	Change Made	Change Type (Major / Minor)	Triggered By
v1.0	[DATE]	[E.G., "Initial matrix built in Chapter 4"]	Major	[E.G., "First build"]
v1.1	[DATE]	[E.G., "Added Three-Tier Emotional Filter"]	Minor	[E.G., "Chapter 5 integration"]
v1.2	[DATE]	[E.G., "Applied genre calibration"]	Minor	[E.G., "Chapter 6 calibration"]
v2.0	[DATE]	[E.G., "Cadence signature restructured for book-three arc"]	Major	[E.G., "Character arc progression"]
[NEXT_VERSION]	[DATE]	[CHANGE]	[TYPE]	[TRIGGER]

7.4.3 Version Archive Protocol Checklist

Follow this every time you create a new version.

- ☐ The previous version file is moved into the "Archive" subfolder within the character directory.
- ☐ The archived file retains its original name and version number.
- ☐ The new version is saved in the active folder with the updated version number.
- ☐ The Version Change Log is updated with the new entry.
- ☐ The active folder contains only the most current version of each asset.
- ☐ You can open the archive and locate any previous version in under fifteen seconds.
